RE: Recommendation Letter for MCR

Dear Mr. Aylward,

It is my absolute pleasure to recommend Mid-Continental Restoration (MCR) as a leading contractor in the historic exterior building repair, restoration, and rehabilitation industry. Their commitment to historic building restoration; including, but not limited to brick masonry, limestone, and historic stucco, never fail to impress. The company's passion for preservation practices is evident in their work and the finished product.

Our historic architecture firm has reached out to multiple members of the MCR team to discuss potential projects and get their recommendation on the best industry practice for each individual project. The team brings their extensive knowledge and expertise to each task, and we have never been concerned about their ability to bid a job and complete it within the specifications of the project. Their professionalism, dedication, and commitment to the project has led to many projects coming in on schedule, if not ahead, and on budget.

Our teams have collaborated on multiple projects that have gone to win awards with the state's Historic Preservation Society. Specifically, Northeastern State University's Wilson Hall, Vernon A.M.E., Northern Oklahoma College Wilkin Hall, Northern Oklahoma College Harold Hall, Denver Davidson on the Oklahoma State capital complex, and the Tulsa Federal Building exterior repoint in downtown Tulsa, OK.

I highly recommend MCR for any exterior building repair, restoration, and rehabilitation project. They are a great resource, and we look forward to working together again on future historic preservation projects.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Timothy Herzer, AIA
Director of Historic Preservation Specialty Practice
