July 30, 2024

To whom it may concern:

I am pleased to provide this recommendation for Mid-Continental Restoration (MCR), who recently completed two extensive waterproofing projects at our stadium. These projects, which began in winter 2022 and concluded in summer 2024, involved significant work on both the home side and visitor side of the facility.

The scope of the projects included the replacement of all expansion joint material, waterproofing of the concrete decks and risers beneath the bleachers and fixed seating areas, coating of handrails, repainting of the structural steel and concrete decks/risers at the underside of the stadium. It also included recoating of the exterior insulated finish system wall material on the exterior of the home side building. The home side project was successfully executed in the first year, followed by the visitor side project in the second year. With all the work that was done, it is not only watertight, but looks brand new.

I am happy to report that both projects were completed on time and within our budget, which is a testament to MCR's excellent project management and field supervision. Their teams demonstrated a high level of professionalism, skill, and commitment throughout the duration of the projects. Communication was seamless, and they were always receptive to our needs and feedback, making the collaboration not only productive but also enjoyable.

We are extremely pleased with the quality of the work performed by MCR and the positive impact it has had on our facility. Their attention to detail and commitment to excellence have left us confident in the durability and aesthetics of our stadium. Given our satisfaction, we have engaged MCR for another project and plan to continue utilizing their services in the future.

In conclusion, I wholeheartedly recommend MCR for any waterproofing projects. Their professionalism, expertise, and dedication to customer satisfaction are truly commendable. Please feel free to contact me if you require any further information or specific examples of their work.
